

# Interactive Solutions

**D3**

## **Who?**

We are D3. We provide innovative, interactive touchscreen and digital signage solutions to our global network of partners. We believe that through innovation we can make the world a truly inspiring place to live, work, learn and play.

## **What?**

Technology that provides a simple solution to an intricate problem is at the core of what we do. We provide lasting, well thought-out, intuitive solutions to our clients. Our touchscreen technology and digital signage solutions simplify the complicated.

## **When?**

We're a young company, but we're the best at what we do. We were formed in 2010 as an OEM business catering to clients around the world. Over the years we've continued to grow, learn and develop. In 2015 we decided to build on our experiences and launch our own brand, D3. Since then we've gone from strength to strength.

## **Where?**

We've got a global network of partners. But our HQ and manufacturing facilities are based in Seoul, South Korea, a global technology hub. This allows our company to stay innovative, informed and nimble.

## **Our Vision**

We design with innovation, build with precision and distribute with care. Our vision is to make the world a more inspiring and interactive place to be. Originality is instilled in everything that we do. Our interactive solutions are born out of our vision to innovate and push the boundaries of what is possible.

## **Our Partners**

We aim to be the best at what we do and to nurture our business through trust, innovation and reliability. We cultivate lasting, mutually beneficial partnerships with our global network of distributors, resellers and end-users. Year on year we have grown and year on year we continue to create simple, intuitive, interactive solutions that help our users to work more efficiently, learn more engagingly and convey their messages more effectively.

## **Our Interactive Solutions**

From concept to creation our interactive solutions are about providing answers to problems. With our help you can make meetings more engaging, and classes more interactive and inspiring. We also help our clients to make advertising more effective and more impactful. We offer turnkey solutions for both business and education. From software, to interactive displays and accessories, we have everything you need to make an impact straight from the box.

# Interactive Flat Touch Displays

## G Series

Simple and versatile. From the boardroom to the classroom you can use the G Series to make classes more interactive or your office a more engaging and interactive place to work.

### IR Sensor Technology

Our G Series has IR sensor technology and up to 20 simultaneous touch points. It also comes with AG glass as standard and an anti-fogging (AF) option too.

### UHD Picture Quality

Technology can bring classes to life and make meetings more engaging. Our G Series has an Ultra HD screen that lets you present and collaborate with crystal-clear picture quality.

### Dual OS Support

Windows and Android. In business adaptability is key. With our G Series you can switch between Windows (OPS) and Android (Internal) at the touch of a screen.

### Live 4PIP Screen

This nifty feature gives you the ability to display multiple media from four different devices, on the same screen, at the same time. Choose whatever source you need and switch whenever you want.

## EZ Accessories

Our G Series is compatible with our full array of EZ Accessories. These accessories make presenting, collaborating and interacting easy.

### EZ Pen

Use the EZ Pen to write, erase and navigate the screen. In a single click, change the colour of your ink and adjust the nib thickness. Our EZ Pen is also compatible with our Android OS too.

### EZ Box

Our EZ Box is a connection hub with a difference. As well as providing extra ports and wireless access points, it also allows multiple users to connect to the G Series, and collaborate at any one time.

### EZ OPS

Our EZ OPS option is our powerful portable PC module built in conjunction with Intel. Simply slide the EZ OPS into the side of the G Series. Once installed the EZ OPS and G Series act as one unit. Power, temperature control, network connectivity and connections are all synced.

### EZ Buttons

Use the EZ Buttons to tap and launch your favourite programs with the touch of a button. The EZ Buttons also act as a charging and syncing station for the EZ Pen.

## S Series

Interact, educate, learn. Bring your lessons to life with FHD picture quality and 20 simultaneous touch points. The S Series is the perfect interactive option for education.

### IR Sensor Technology

Our S Series has IR sensor technology and up to 20 simultaneous touch points. It's also built for purpose. Its rugged design and rounded edges makes it the perfect option for even the most energetic and lively of classes.

### Full Package

Our S Series isn't just an add-on or an afterthought for classes. It brings real value to the classroom and learning process. It comes with everything you need to fully integrate it into your lessons from day one.

### Cost Effective

Bringing technology to the classroom doesn't always have to cost an arm and a leg. The S Series is our cost effective, interactive option for primary, secondary and higher education institutions.

### EZ OPS Support

Integrating into your existing system is important to us. You can choose to either connect a pre-existing, external computer or laptop in your classroom to the S Series, or simply use the EZ OPS computer module option instead.

## EZ Accessories

Our S Series is more than just an Interactive Flat Touch Display. We provide you with everything you need to interact, present and collaborate in the classroom.

### EZ Pen

Our EZ Pen is great for presenting, annotating and navigating your way through presentations. Use it to write, erase and navigate the screen. Our EZ Pen is also completely compatible with our Android OS too.

### EZ Holder

Our EZ Holder acts as a syncing and charging unit for the EZ Pen. There's no need for batteries, just simply place it into the EZ Holder charging port.

- Full Charge: 2.5 Hours
- Continuous Uptime: 10 Hours
- Standby Time: 6 Days

## **B Series**

Connect, Collaborate, Create. Bring ideas to life with 4K picture quality and PCAP touch technology that let you present, collaborate and interact with precision and a touch of flair.

### **PCAP Sensor Technology**

Our B Series has a matrix of sensors built into the screen that enables up to 50 simultaneous touch points. When the task is intricate, the B Series lets you be as precise as you want to be.

### **Dual OS Support**

Windows and Android. In business adaptability is key. With our B Series you can switch between Windows (OPS) and Android (Internal) at the touch of a screen.

### **Direct Bonding**

Our PCAP B Series is direct bonded. This means that the screen and panel are chemically bonded together leaving no airgap. This improves screen strength and dramatically reduces screen glare and fogging.

### **Live 4PIP Screen**

This nifty feature gives you the ability to display multiple media from four different devices, on the same screen, at the same time. Choose whatever source you need and switch whenever you want.

## EZ Accessories

Our B Series is more than just an IFTD. It's a full interactive solution to business. From collaboration software to our EZ Accessories, we have everything you need to make your workplace a more engaging place to be.

### EZ Pen

Our EZ Pen is great for presenting, annotating and navigating your way through projects and presentations. Use it to write, erase and navigate the screen. In a single click, change the colour of your ink and adjust the nib thickness. Our EZ Pen is also compatible with our Android OS too.

### EZ Box

Our EZ Box is a connection hub with a difference. As well as providing extra ports and wireless access points, it also allows multiple users to connect to the B Series and collaborate at any one time over a Local Area Network.

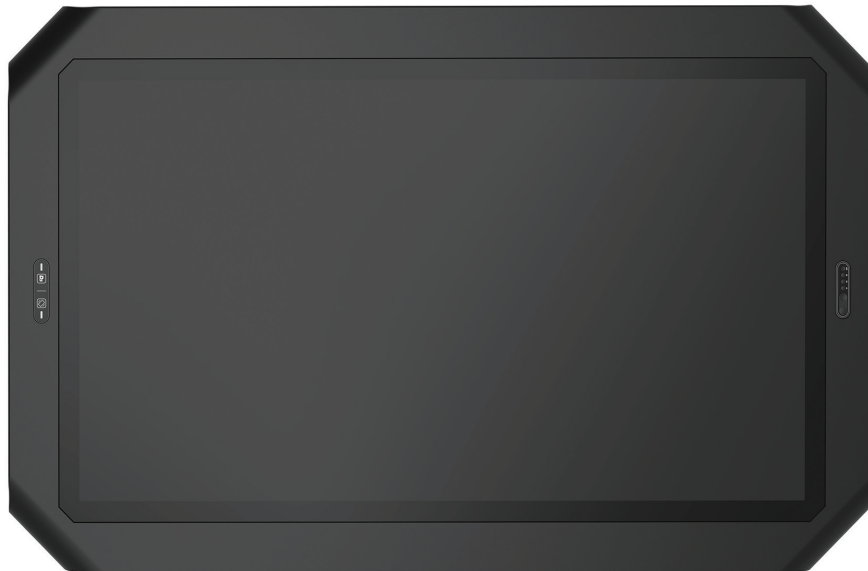

### EZ OPS

Our EZ OPS is our powerful portable PC module built in conjunction with Intel. Simply slide the EZ OPS into the side of the B Series. Once installed the EZ OPS and B Series act as one unit. Power, temperature control, network connectivity and connections are all synced

## T Series

A touch table with a difference. Our T Series comes with fully height adjustable legs, PCAP touch technology and dual Windows & Android OS.

### PCAP Sensor Technology

Our T Series has a matrix of sensors built into the screen that enables up to 50 simultaneous touch points. When the task is intricate, the T Series lets you be as precise as you want to be.

### Dual OS Support

Windows and Android. In a business, commercial or educational environment adaptability is key. With our T Series you can switch between Windows (EZ OPS) and Android (Internal) at the touch of a screen.

### Direct Bonding

Our PCAP T Series is direct bonded. This means that the screen and panel are chemically bonded together leaving no airgap. This improves screen strength and dramatically reduces screen glare and fogging.

### Live 4PIP Screen

This nifty feature gives you the ability to display multiple media from four different devices, on the same screen, at the same time. Choose whatever source you need and switch whenever you want.

## EZ Accessories

Our T Series is compatible with our EZ OPS, making presenting, collaborating and interacting easy.

### EZ OPS

Our EZ OPS is our powerful portable PC module built in conjunction with Intel. Simply slide the EZ OPS into the side of the T Series. Once installed the EZ OPS and T Series act as one unit. Power, temperature control, network connectivity and connections are all synced.

## Where is our T Series used?

Our T series Touch Table has been used globally, in a variety of different ways, in a multitude of different companies, commercial spaces, information points and educational institutes.

### Hospitality

From hotel lobbies to restaurants, clubs and bars. Our touch table has been successfully integrated into businesses large and small the world over.

### Commercial Spaces

Whether you're looking for a new way to advertise your products or you just want to provide your customers with information, the T Series helps you do it all.

### Education

From primary to higher education, the touch table is perfect for making lessons more engaging and interactive.

### Banks and Building Societies

Our T Series is used as an information point and client Q&A terminal in banks and building societies around the world.

# EZ Accessories and Software Solutions

## EZ Pen and EZ Holder

Annotation made easy

### D3 Software Synced

Our EZ Pen is built for compatibility. It is fully integrated with our D3 software solutions. Sync and launch our D3 software solutions with a single click of the EZ Pen.

### Syncing Station

Once inserted into the USB port on the side of your Interactive Flat Touch Display (IFTD), the EZ Holder syncs your EZ Pen with your IFTD and D3 software.

### Charging Station

The EZ Holder also acts as a charging station for the EZ Pen. There's no need to worry about batteries, just place the EZ Pen into the charging and syncing port and it will automatically charge and/or sync.

### Annotate Over Anything

Synced with our D3 Board software, you can use the EZ Pen to annotate over internet pages, live content and media, PowerPoint slides and any compatible document.

### Rechargeable

- Full Charge: 2.5 Hrs
- Continuous Uptime: 10 Hrs
- Standby Time: 6 Days

### 4 Colour Clicker

Our EZ Pen is completely compatible with all of our D3 software. Change to 1 of 4 colours with a single click.

### LED Indications

LED indications let you know when your EZ Pen is synced, charged or if there's an issue.

### Home Button

Navigate to and from your desktop and D3 software with a single click. Use the Home Button to switch between your ink and cursor.

### Scroll Wheel

Navigate documents, adjust pen nib and eraser thickness, browse and navigate the web.

## EZ Pen and EZ Buttons

Tab, launch and annotate

### Tab and Launch

Our EZ Buttons are made to make presenting and interaction more fluid. Tab any program you want and launch it with the touch of a button. Delete and edit your tabbed programs anytime you want.

### Syncing Station

Once inserted into the USB port on the side of your Interactive Flat Touch Display (IFTD), the EZ Buttons sync your EZ Pen with your IFTD and D3 software.

### Charging Station

The EZ Buttons also act as a charging station for the EZ Pen. There's no need to worry about batteries, just place the EZ Pen into the charging and syncing port and it will automatically charge and/or sync.

## EZ OPS

Powerful, portable PC module

### High Performance

Our EZ OPS was purpose built for our Interactive Flat Touch Displays (IFTDs) and developed in conjunction with Intel. It's built for touch and interactivity.

### Wire-Free & Wireless

You can slide our EZ OPS seamlessly into the side of all our IFTDs. This negates the need for external connections and wires. After installation, you can easily connect the EZ OPS to existing wireless or wired networks.

### Fully Integrated

Once installed the EZ OPS and IFTD act as one unit. Power, temperature control, wireless network connectivity and connections are all synced. It can also be fully integrated into pre-existing IT systems without any hassle.

### Secure

Whether in the classroom, boardroom or a commercial space, you can securely fasten the EZ OPS to the IFTD to prevent tampering or theft.

*Next Generation EZ OPS now available.*

## EZ Box

Connect and collaborate

### Smart Access Point (AP)

Optimize your connections with the EZ Box. Connect devices, collaborate and create on your D3 Interactive Flat Touch Display (IFTD) over a Local Area Network.

### Connect More

Our EZ Box is also a port extension hub. Connect more devices to your Interactive Flat Touch Display (IFTD), using the available port extensions.

### Easy Installation

With a dedicated connection port on the side of the Interactive Flat Touch Display (IFTD) and a simple step-by-step setup procedure, our EZ Box is a great turnkey, interactive solution for any business.

### D3 Software Solutions

Our EZ Box also comes complete with our EZ Presenter software for business. Coupled with the EZ Box, our EZ Presenter software makes meetings more interactive and collaborative. Login quickly, screen share and collaborate through two-way touch, in real-time.

D3 is a registered trademark. D3 Products are designed specifically to work with EZ Accessories and are not designed to be used in conjunction with any third party products. All weights, dimensions & specifications are approximate. [www.d3world.net](http://www.d3world.net)

## Software Solutions

As well as IFTDs we also offer our clients intuitive software solutions for business and education, too.

### Education Software

#### D3 Board

D3 Board is our annotation software with a little something extra. As well as a full annotation suite and the ability to annotate over anything (websites, documents, pictures and videos), it also has an unlimited canvas and is completely PowerPoint synced. Open any compatible file through our D3 Board software, navigate through it, annotate over it, save and send.

#### D3 Collaboration

Our D3 Collaboration software is powered by Oktopus™ and made to make classes more engaging and learning more fun. It has fully integrated subject driven tools, a PowerPoint Plugin, voting tools, and combined with our EZ OPS you can connect to other devices, collaborate, screen-share and interact two-ways.

### Business Software

#### Intel Unite

We're a chosen vendor of Intel's Unite software for business. This means that we can offer our clients and partners one of the best business software solutions on the market. Intel Unite is about connecting, collaborating, and sharing securely.

#### EZ Presenter

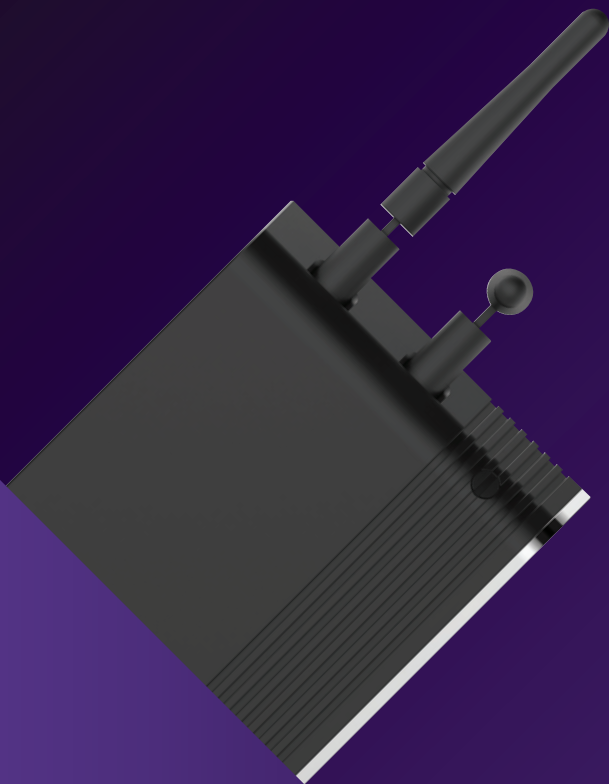

EZ Presenter is our homegrown business software. Built for quick collaboration and touch, it offers screen-sharing, two-way touch interaction and everything else you need to make your meeting more collaborative.

### Android Software Solutions

#### Squid

We've also worked closely with our friends at Squid™ to develop an app that lets you annotate in Android. Squid is pre-installed onto all of our IFTDs with Android. Simply switch on and start annotating. It offers a full annotation suite and is also completely compatible with our EZ Pen.
