### E-SERIES MONITORS

iiyama's most universal monitors, classified into the E-series, are the perfect choice for home-entertainment providing excellent features and great quality. The monitors are fitted with the latest high quality LED backlight TN panels and offer high contrast and very good image quality combined with low power consumption. TN panel guarantees extremely fast response time, making the E series monitors most suitable for gaming. VESA compliance allows for easy installation to any wall or mounting bracket. Ultimately perfect for both home and office use.

#### TN panel

TN is the most common LCD technology used. The main advantages of TN panels are fast response time, good overall performance and attractive price-point. In combination with LED backlight, TN technology also offers high brightness and lower power consumption than other technologies.

#### ACR (Advanced Contrast Ratio)

Contrast Ratio is a measurement of the difference between the darkest black and the brightest white your monitor can display. Advanced Contrast Ratio is a feature that automatically adjusts contrast and brightness of the screen to assure perfect picture quality while watching films and playing games.

#### VESA

VESA mount compliance guarantees you can easily mount your monitor to any compatible bracket and mount it on a wall optimising your workspace and making sure you look at the monitor at a comfortable angle.

**B-SERIES MONITORS**

iiyama B-series monitors come equipped with a number of features to help you create a workspace that best fits your needs. The stand of the monitor is height adjustable ensuring perfect posture and optimal viewing which makes it ideal for long term usage. The B-series guarantees high performance, ergonomic design and power efficiency taking your professional experience to the next level and helping reduce the total cost of ownership.

**HAS**

A Height Adjustable Stand allows you to set the perfect position of the screen ensuring ergonomic posture and optimal viewing comfort which benefits not only your health but also productivity.

**PIVOT**

Screen rotation means you can change the position of the screen from landscape into portrait. This feature can be handy whilst working with long spreadsheets or texts.

**Sustainability / Power saving features**

Reducing the environmental impact of our products starts with the product design phase. Design dictates the quantity of raw materials, type and recyclability of materials, energy consumption required for manufacturing and use, and the ease of recycling. All our products comply with the RoHS (Restriction of Hazardous Substances) directive. Most of our products are TCO, Energy Star® and EPEAT qualified. These are all comprehensive environmental ratings that help identify greener computers and other electronic equipment.

**X(B)-SERIES MONITORS**

The X-series monitors come with top-class features and deliver best-in-class performance. Incorporating the latest IPS or AMVA technology along with multiple inputs, the displays offer supreme colour performance and optimum compatibility across a broad range of multi-media devices. They assure consistent and accurate colour reproduction from all viewing angles. The image is clear and blur-free as the panels can process high speed signals without data loss. The X-series monitors are a huge hit with demanding users like photographers, graphic artists and DTP professionals.

**AMVA+**

AMVA technology offers higher contrast, darker blacks and much better viewing angles than standard TN technology. The screen will look good no matter what angle you look at it. AMVA+ technology is the best choice for almost any professional application.

**IPS**

The IPS panel technology guarantees consistent colour reproduction with wide viewing angles and high contrast and is therefore especially recommended for graphics design and other applications which require colours to be displayed accurately. The response time of the panel allows for smooth playback while watching films and playing games, making the IPS the best all-round technology suitable for both business and home use.

**Inputs (HDMI/DisplayPort)**

A wide range of digital video inputs assures compatibility with multiple platforms. The X-series are all provided with DVI and HDMI or DisplayPort. They can be used with any laptop, MAC or desktop PC.

### G-SERIES MONITORS

Through all stages: concept, design and development – the G-series monitors were meant to be real game changers giving true hardcore gamers the competitive edge they need to make split second decisions. Smooth and judder free graphics during fast paced games are guaranteed by the use of a high quality panels with a blistering 1ms response time. A truly amazing gaming experience.

#### 144Hz

The use of a high quality 144Hz panel guarantees a flawless gaming experience - less fracturing, smoother graphics motion during fast paced games and judder free animations. For 144fps game-play it is required to have a graphic card that can at least support Dual Link DVI (GB models only).

#### Full HD

With FHD 1920x1080p resolution your monitor is ready to display high definition images. This means you can accommodate more information on your screen; e.g. 60% more in information can be shown in comparison with a 1280x1024 monitor.

#### Speakers and headphone socket

Playing with friends? Use the speakers. Don't want to disturb anybody? Plug your headset to the headphone socket and turn the volume up.

**P-SERIES**

iiyama Protective Glass Range is called the P-series. The toughened safety glass fitted behind the bezel offers minimum of 8H hardness rating, able to resist above normal pressure or impact to the display. The solid and robust design is capable of withstanding the requirements of a demanding user. Therefore the P-monitors fit the growing need for protected, economical LCD's within Education, Retail and Industrial applications.

**CCTV**

Designed for demanding CCTV and Broadcast Applications iiyama 19" CCTV display features two BNC inputs and outputs which make transmitting digital signal sources such as NTSC, PAL, or a similar color-coding system possible allowing you to plug your BNC type security camera or a video processor directly into the monitor. The monitor features also a VGA input and an RCA Adapter is included to ensure compatibility across multiple platforms. VESA compliance allows for easy installation in any surveillance and security environment.

**LED-backlit**

The use of LED backlight considerably lowers the power consumption and reduces the CO2 emission into the environment making this monitor a true ECO-friendly product.

**VESA**

VESA mount compliance guarantees you can easily mount your monitor to any compatible bracket and mount it on a wall optimising your workspace and making sure you look at the monitor at a comfortable angle.

## TOUCHSCREENS

As a leading manufacturer of touchscreen solutions in Europe, iiyama has one of the broadest portfolios of touch monitors offering the most advanced technologies available on the market. The high quality range guarantees stable, drift-free operations and unprecedented durability. Wide variety of form factors including bezel-free displays and open frame monitors in both standard and widescreen formats allows you to choose the solution most suitable for your business needs.

### **SURFACE ACOUSTIC WAVE – single-touch solutions**

As the screen is covered with a glass layer, this technology offers great picture performance (high contrast and colour accuracy) and scratch-resistance making it the ideal choice for use in public areas. Moreover, even if the screen is scratched, the touch function remains unaffected. Surface Acoustic Touchscreens are activated with finger or a special stylus.

### **RESISTIVE – single-touch solutions**

The resistive touchscreens work with both finger and any input device which guarantees high accuracy level. The 5 wire resistive screens, do not lose calibration over time. Durable, robust design and an IP54 rated housing allow for installation in any kind of environment including industrial areas and retail.

### **OPTICAL – multi-touch solutions**

The optical touch technology does not rely on an overlay or substrate to register a touch event, so it's impossible to physically "wear out" the touchscreen. In fact you don't really have to physically touch the screen. You just need to put your finger (gloved or not) or any kind of stylus very close to it. The optical technology ensures great picture performance. As there is no overlay or substrate on the screen the display characteristics remain virtually unaffected by the touch function.

### **PROJECTED CAPACITIVE – multi-touch solutions**

Thanks to the glass overlay this technology is highly durable and the touch function remains unaffected even if the glass is scratched. It offers perfect picture performance and will work with finger (gloved or not) and a special (conductive) stylus.

**LFD-SERIES (LARGE FORMAT DISPLAYS)**

Full HD professional, feature-rich and robust, iiyama's large format screens are available in different sizes (32", 42", 46", 47", 55" and 65") and with or without multi-touch functionality. The displays offer an exceptional capacity within Retail, Education, Training, Corporate and B2B markets. Incorporating the latest AMVA3 or IPS panel technology, the displays guarantee high brightness, exceptional colour clarity and great viewing from all angles. Features include PIP and PBP perfect for Video Conferencing or handing multi-input content in many environments. An ambient light sensor delivers exceptional performance with the added benefit of saving on power. Landscape and Portrait friendly, the display can be mounted according to the application for true impact in Interactive Digital Signage. iiyama Large Format Displays will suit a massive range of applications including public signage, retail, exhibitions and conference rooms, POS/POI, control rooms, and production facilities.

**PIP**

PIP (Picture in picture) function allows you to watch images coming from two different sources at the same time.

**InfraRed**

Our new series of InfraRed touch screens (42", 46", 55", 65") offer the fastest and most accurate touch response possible on LFD screens. The added benefits include 2 or 6 point touch capability and more robust performance for even the toughest environments.

**Portrait / landscape**

The entire xx64/xx80 range of LFD's offer the ability to be used in either portrait or landscape mode for all signage environments, allowing for high impact digital signage configurations.

EPEAT\* - EPEAT is a comprehensive environmental rating that helps identify greener computers and other electronic equipment. The Silver certification means the monitor meets all required criteria plus at least 50% of the optional requirements. EPEAT Silver is valid in countries where iiyama registers the product. Please visit [www.epeat.net](http://www.epeat.net) for the registration status in your country.

## **iiyama**

iiyama stands for high level proven expertise in the monitor business, a versatile display portfolio, quality and outstanding customer service.

### Values

iiyama values customer relations, delivering trustworthy commercial advice to B2B clients and end-users allowing them to make informed purchase decisions. iiyama concentrates on manufacturing best quality, highly reliable screen solutions which minimize the environmental footprint and are in line with the latest technologies available.

### Mission statement

Taking the best from our heritage of one of the first brands involved in the display industry and combining it with Vision and Technology facing the future, it is iiyama's aim to continue to build the number one brand in the display solutions field.

We strive to maintain close, responsive and direct relations with our clients, as understanding our customers' needs and serving them with a professional support system is always at the core of our actions.

Ensuring our supply chains and staff are managed in ethical ways and reducing the environmental footprint, iiyama is strongly committed to the concept of business that is socially responsible and sustainable.
